

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: March 31, 2008

Water Body Under Evaluation:

Water Body ID #: 1234
Name: Monegaw Creek (Class C)
Length of Segment: 10.0 miles
County(ies): St. Clair

Use Attainability Analysis (UAA) Study:

UAA ID #: 0669
Submitter: SES, Inc.
Date(s) Conducted: October 25, 2007
Date Received: November 14, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in October 2007 and no WBCR was observed. No interviews were conducted during the survey. The survey noted boat access and fishing tackle. The creek already has Secondary Contact Recreation (SCR) assigned.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 11 out of 20 sites evaluated and the median depth at 9 of those sites. Due to meeting the depth criteria, the committee recommends the WBCR use designation be retained. Due to existing use and evidence of secondary contact (boat access, fishing tackle), the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

- ☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
